Summary of Sachar Committee Report

The Rajinder Sachar Committee, appointed in 2005 by the Prime Minister Manmohan Singh, was commissioned to prepare a report on the latest social, economic and educational condition of the Muslim community of India. The committee was headed by the former Chief Justice of Delhi High Court Rajinder Sachar, including other six members. The committee prepared a report of 403 pages, and presented in the lower house (Lok Sabha) of the Indian Parliament on 30 November 2006 (20 months after obtaining the terms of reference from the PMO).

The committee had highlighted and presented its suggestions and solutions to include mainstream Indian Muslims. The report is first of its kind revealing the backwardness of Indian Muslims.

According to **Sachar Committee report** some of the **Key Findings** are:

- *The status of Indian Muslims are below the conditions of Scheduled Castes and Scheduled Tribes.*
- *The overall percentage of Muslims in bureaucracy in India is just 2.5% whereas Muslims constitute above 14% of Indian population.*
- *There was a wide-spread demand for affirmative action especially in the form of reservations.*
- *Muslim children are at a slightly higher risk of child malnutrition than other Hindu children.*
- *As many as 25 percent of Muslim children in the 6-14 year age group have either never attended school or have dropped out.*
- *Only one out of the 25 under- Graduate student and one out of the 50 post Graduate student is a Muslim in premier colleges.*
- *The presence of Muslims was found to be only 3% in IAS, 1.8% in IFS and 4% in IPS.*
- *Share of Muslims in employment in various departments is abysmally low at all levels.*
- *In no state does the representation of Muslims in the Government departments match their population share.*
- *In the light of the observations in the report the ‘Sachar Committee’ made so many recommendations ; one such is reproduced here for general awareness;*
- *Mechanism to ensure equity and equality of opportunity to bring about inclusion should be such that diversity is achieved and at the same time the perception of discrimination is eliminated.*

A brief history of emergence of the “Hidaya Foundation Trust”

Therefore, for the improvement of the society a galaxy of lovers of education including health awareness, prudent, dedicated, honest, souls and philanthropists put their heads and hearts together and affirmed to form a charitable, non-profitable educational and Socio-Welfare Organization in order to take the entire burden of the so called backward communities for their overall developments.
